

## A TIBETAN CATALOGUE OF THE BLOCKS OF THE LAMAIST PRINTING HOUSE IN AGINSK

BY

G. BETHLENFALVY

The fact that up till now bibliographical work has formed such an important part of Tibetan studies is really a sign of their relative backwardness. It is a consequence of the special restraining factors that have rendered the comprehension of the Snow-land especially difficult. Due to the isolation of Tibet, to the haphazard character of manuscript collections outside Tibet, to the limited number of scholars, and to a number of other factors there are still too many blank spots in our knowledge of Tibetan culture.

The work of listing the material has in fact been in progress since the very beginnings of modern Tibetology: Alexander Csoma de Körös has started exploring the *Kanjur* and *Tanjur*, the historical and medical literature, and nearly every generation of Tibetan scholars has made its contribution.

In this way, we have a bibliographically more or less complete picture of the works included in the canon though it is an inexhaustible source of knowledge from the point of view of contents. The significance of Prof. L. Ligeti's catalogue of the *Mongolian Kanjur* cannot be overestimated in this respect.

Bibliographical research on the extracanonical literature is concentrated in two fields: on the one hand there is the cataloguing of collections outside Tibet, and on the other, the utilisation of Tibetan bibliographies.

The best of the catalogues are those which either review the oldest material (e.g. from Tun-huang) or provide us with a complete picture of a certain group of publications. Thus, due to Haenisch's activity, the German collections give a good representation of the Tibetan publications printed in Peking. Further, the elaboration of *gsun-'bums*, i.e. the collected works of important and productive authors, have proved to be very useful.

From the very beginnings attention has also been drawn to the Tibetan bibliographical works (*gsan-yig*, *thob-yig*, *mchan-tho*, *dkar-čhag* etc.) utilising more and more the enormous amount of knowledge amassed in them. Still, even the most important representatives of these works, though known for a long time (e.g. *Klon-rdol bla-ma*'s *Mchan-tho*) were not published in modern editions until quite recently.<sup>1</sup>

<sup>1</sup> Lokesh Chandra, *Materials for a History of Tibetan Literature III, Satapitaka 30* (New-Delhi 1963), pp. 603—696.

There is another type of Tibetan bibliographies little used so far: the *dpar-tho* ~ *par-tho* or «printing-office catalogue». There was already knowledge of the existence of these lists in the last century, but, as far as I know, Vostrikov was the first to use one in his critical remarks to van Manen's paper.<sup>2</sup> This catalogue, entitled *Byañ-phyogs-kyi A-ko'i dgon-sde čhen-po Bde-čhen lhun-grub-glin 'dir bžugs-pa'i dpar-gyi tho-yig*, belonged to the printing house (*dpar-khan*) of the Aga monastery. It is most unfortunate, that Vostrikov did not publish it.

As far as I know the first Tibetan printing-office catalogues were those published by B. Rinchen in 1959, and in the same year, and again in 1961 and 1964 by Lokesh Chandra.<sup>3</sup> Rinchen's publication contained the printing catalogues of 31 Buriat-Mongolian monasteries with that of the Aga monastery among them. It was in Russian script, compiled in the chancery of the Khampo Lama in 1911. He gave it to Žamcarano in 1923 and from him it passed to the author.

The *dpar-tho* I am going to introduce here is also a printing list from the Aga monastery. It can be found in Patna (India) in the library of the Bihar Research Society under the catalogue number 1091 (B. No. 311).<sup>4</sup> The xylograph is 43 by 6 cm, and is printed on Russian paper in quite easily legible letters. It came into the library's possession as part of the material that Rāhula Sānkṛtyāyana brought back from his 1930–31 trip to Tibet.

This *dpar-tho* of the Aga monastery contains four times as many blocks as that of B. Rinchen and is also different from the copy used by Vostrikov. This fact can easily be proved though we do not know much about Vostrikov's list. We do not even know whether it was a xylograph or a manuscript. We only know its title, which is different from that of ours, its structure, and some of the titles included in it. The structure is slightly different, too.

According to Vostrikov, his catalogue was divided as follows:

<sup>2</sup> A. Vostrikov, *Some Corrections and Critical Remarks on Dr. Johan van Manen's Contribution to the Bibliography of Tibet: BSOS VIII* (London 1935–1937), pp. 62, 65, 69, 79.

<sup>3</sup> B. Rinchen, *Four Mongolian Historical Records*, *Śatapitaka* 11 (New-Delhi 1959), pp. 71–121. Lokesh Chandra, *Tibetan Works Printed by the Shoparkhang of the Potala: Jñānamuktāvalī*, New-Delhi 1959, pp. 120–132; id., *Les impriméries tibétaines de Drepung, Derge et Pepung: JA* 249 (Paris 1961), pp. 503–517; id., *Tibetan Buddhist Texts Printed by the Mdzod-dge-sgar-gsar Monastery: IIJ VII* (The Hague 1964), pp. 298–306. Cf. also the Mongolian printing lists in *Studia Mongolica*, Tomus I, Fasc. 16 (Ulaanbaatar 1959).

<sup>4</sup> I would like to express my gratitude to the Bihar Research Society and its Library for allowing and helping me to study the book and granting permission to publish it.

1. *par riñ-po'i gras*
2. *par 'brin*
3. *par thuñ*
4. *śin-tu sna-thuñ*

Our catalogue consists of the following parts:

1. long prints without any specification (the term *rgya-gžuñ-gi skor* most probably means «the group of Sanskrit books») [1—10]
2. *spar 'brin-po khru-chad-ma'i skor* [11—12] «middle sized (circa 1/2 m) prints»
3. *spar thuñ-nu'i skor* [13—14] «short prints»
4. *dpar thuñ gsar-ma'i skor* [15] «new short prints»
5. . . . *Sog-skad-du bsgyur-ba-rnams dpar-du 'khod-pa'i skor* [16] «Mongolian prints»

It may be of interest to mention here that the *Mjod-dge sgar-gsar* monastery's *dpar-tho* has only two parts, the first is the list of the long prints without specification, and the other is specified with the term *sna-thuñ-gi skor*. According to Lokesh Chandra, the long format is called *mda'-chad-ma* as well.<sup>5</sup> From M. Taube's paper we learnt the structure of a handwritten *dpar-tho* of the Mongolian *Phun-chogs sku-gsum-glin* monastery. It consists of four parts.

1. *spar riñ-po*
2. (par) *'brin*
3. *'brin-gras-las čhuñ-zad čhe-ba*
4. *spar thuñ-nu'i gras*

In most cases *dpar-thos* include blocks both for printing books — and pictures, flags etc. Vostrikov, however, did not mention the existence of Mongolian titles or picture-blocks in his catalogue.

If we check the few titles quoted in Vostrikov's paper they turn out to be identical with our titles, only they are found on a different page.

In summary, we can say that the monastery in question had several lists of its printing blocks. Our *dpar-tho* is only one of the many, and so are Vostrikov's and Rinchen's copies.

This is easy to understand if we take it into consideration that these lists were compiled with an aim similar to the catalogues of our modern printing houses. They were not so carefully elaborated as e.g. a *mchan-tho*. The contents (mentioning the size of the books and the number of pages) was important information for a potential customer as the price of a book depended mostly on these factors. New lists might have been prepared at any

<sup>5</sup> Lokesh Chandra, *IIJ* VII (1964), p. 299.

<sup>6</sup> Manfred Taube, *Die Bedeutung einheimischer Bibliographien für die Erforschung der tibetischen Literatur: Studia Asiae*, Part I (Halle 1968), p. 287.

occasion when the stock of the blocks changed: new ones were carved, old blocks were destroyed etc. We know that sometimes lists were issued containing the blocks carved in a single year. In the full lists of a monastery's printing blocks the planned editions were also included leaving an empty space<sup>7</sup> for the number of pages.

The rarity of the *dpar-thos* may be for a similar reason. It would be difficult to find a catalogue of a European printing house from the beginning of our century: when it had lost its relevance it was thrown away.

By studying this kind of bibliography we can get a picture of the sphere of influence of a lamaist printing house: e.g. our list prepared in Transbaikalia was found in Patna, to where it came from Central Tibet. The prints of the Aga monastery were famous all over the Lamaist world because of their high quality and legible carving.

In Aginsk there are two monasteries, the older one of which was built from 1811 to 1816.<sup>8</sup> Its name written on the door is *Čhos-sde čhen-po Bde-čhen lhun-grub-glin*, or more completely, according to R. E. Pubaev: *Bšad-sgrub bstan-pa'i 'byuñ-gnas čhos-sde čhen-po Bde-čhen lhun-grub-glin*.<sup>9</sup> An old picture of it can be seen in A. Grünwedel's *Mythologie des Buddhismus* (Leipzig 1900), p. 21.

I think it is not without interest to publish the whole text in its original form, and also a photo-copy of it, as no facsimile of a *dpar-tho* has been published so far.

The page numbers are given in square brackets. As they are different from the Tibetan pagination I give a list to show the correspondence:

[1a—b]	<i>gčig</i>	$\left. \begin{array}{l} rgya-gžuñ-gi skor \\ gsuñ-'bum \\ \text{texts, commentaries and manuals} \\ \text{for studying philosophy, tantra,} \\ rig-pa, etc. \\ gso-ba rig \\ spar 'brin-po khru-chad-ma'i skor \end{array} \right\}$
